

BARCODE HANGING SIGNS

By the warehouse identification & marking specialists

Warehouse hanging signs are a highly visual method of identifying bulk storage areas in warehouses and distribution centers. Barcode signs are designed for ease of use and to be long-lasting.

The signs provide a point of reference to identify locations, in most cases being read from a distance. They are typically positioned around 15 to 30ft from the floor and at an angle so the barcode and eye-readable elements are directed toward the reader.

Hanging signs are supplied in a range of standard formats, however customer specific and specialist designs can be achieved easily with our full production capabilities. Materials used are lightweight with full color options.

ASG Services' personnel are trained and insured to provide professional installation services. The highest standards and rigorous accuracy are ASG Services promise and validate their reputation.

Installing warehouse barcode signs can be dangerous due to working at height, we always urge caution.
