

FLOOR LABELS

By the warehouse identification & marking specialists

ASG Services floor label solutions are developed to perform in the most destructive area of a warehouse, the floor. Anything left on the floor is subject to impact damage, and general misuse, so our labels and protectors aim to withstand degrees of reasonable force.

Floor labels range from a consumable self-adhesive flexible plastic to the protective aluminum frame and Lexan cover which sit over a label. Along with others in between, we have an option to meet budgets and durability.

Self-Adhesive:

Our self-adhesive labels are a tough three-part composite plastic construction which is flexible to improve durability while being extremely strong to minimize tearing. These are a cost-effective solution with a unique high strength adhesive. Customers often choose these and order duplicates for high traffic areas.

Aluminum Floor Label Frame:

The protective frames are made from CNC finished, 1/8" and 1/16" aluminum, with a high-quality finish and accurate measurements. The frames are held in place with screws and provide improved protection against forklift trucks and pallets.

The frames can be supplied complete with a location label that is designed with the relevant location reference, barcodes and color coding if needed. The labels are complete with a self-adhesive backing for additional stability.

To complete the label defense, a transparent Lexan plate is positioned over the label further shielding it from the elements and impact.

The framed floor label can be self-applied or by ASG Services' fully trained installation teams.

Color options available.

Scratch resistant.

Any application temperature.

No barcode shrinkage.

High strength permanent adhesive.

Temporary & permanent attachment.

Can be used in freezers.

Chemical resistant.

Installation services available.
